☁ [Trailblazer Profile](#)

SUMMARY

Computer Science Engineering student (AI & ML) with strong CS fundamentals, hands-on expertise in Python and Java, and experience building scalable software, network-adjacent anomaly detection, and distributed systems. Skilled in unit testing, secure coding practices, and cross-functional team leadership.

EDUCATION

Technocrats Institute of Technology (Excellence)

Bachelor of Technology in CS Engineering (AI & ML)

Bhopal, India

Sep 2023 – Present

SKILLS

Programming: Python, Java, ABAP

Computer Science: Data Structures & Algorithms, Software Engineering

AI/ML & Agents: Deep Learning, Pandas, Random Forest, Agentic AI

Cloud & Tools: Microsoft Azure, GitHub, SAP ABAP

Professional: Technical Communication, Team Collaboration, Leadership, Knowledge Sharing, Analytical Thinking, Time Management

ACHIEVEMENTS

Smart India Hackathon 2024 (SIH 24)

Dec 2024

Team Leader – National Grand Finale Finalist

- Led a team in building an AI smart agriculture solution, managing technical design, SDLC, requirements analysis, and delivery under tight deadlines.

SBILife Hack-AI-Thon 2024

Jan 2024

Team Leader – AI Software Development

- Engineered a modular Cyber Insurance Fraud Detection pipeline using Python, Random Forest, and SMOTE for optimized inference and preprocessing.

PROJECTS

LedgerIQ — AI Finance Controller | *Python, Pandas, LLM/AI*

Aug 2026

- Built an AI-powered finance reconciliation platform that automatically reconciles orders, payment-gateway transactions, and bank settlements using deterministic matching and AI-assisted exception reasoning.

AI Car Damage Detection & Repair Estimator | *Python*

Sep 2024

- Developed a real-time vehicle damage detection pipeline and integrated Mistral LLM for automated repair-cost estimation.

Cyber Fraud Prediction System | *Python, Random Forest*

Feb 2025

- Designed a real-time prediction backend with structured data processing and automated ML inference workflows.

Voice2Insights | *Python*

Jan 2026

- Created an end-to-end audio processing pipeline using Whisper and LLMs with automated JSON/CSV output formatting.

CERTIFICATIONS

Oracle Certified Associate: Agentic AI Foundations (1Z0-1157-26)

Salesforce Trailblazer: Completed Platform Developer I & Agentforce trails

Microsoft Certified: Azure Fundamentals

SAP Certified Developer (ABAP)
